FutureTek... Application Hosting Services

A key focus area and a fast growing service offering. We provide both general purpose and industry specific application hosting services to **small and mid-size** corporations. FutureTek will assign dedicated teams to either **host popular applications or to host customer's in-house applications** in one of FutureTek's hosting facilities. FutureTek will take care of upgrades, new releases and future growth. Industry solutions are offered to our Retail, Wholesale/Distribution and Manufacturing customers and soon will be expanded to other vertical markets. Application hosting, offers the following strategic advantages....

- Low capital investment and control on operating cost
- Better focus on business issues and less on IT issues
- Leverage and access to world-class capabilities
- Faster access to critical applications
- "Pay as you go" and lower TCO

FutureTek... Industry Specific Software Products and Services

We offer industry specific versatile software products which are comprehensive and use state-of-the-art WEB technology. Small to medium businesses with a focus in retail, Wholesale/Distribution and Manufacturing market space benefit from these offerings. Additionally, we offer common business

management products such as HRM, CRM and Accounting to help our customers, in other industries. Our product offerings include:

Store/ECENTURY: A comprehensive merchandise and store management software. Fully integrated and supports multi-warehouse and multi-branch operations with excellent security features and extensive reporting capabilities.

Business/eCENTURY: An integrated ERP software for small to medium sized manufacturing companies. Incorporates functional modules such as Purchasing, Production Planning, Inventory, Sales, CRM, Quality Management, HRM and Finance.
